NATURAL FLOCCULANT/ COAGULANT

- M Vest Water's flagship product NORWAFLOC® is environmentally friendly & non-toxic.
- It comprises a combined polysaccharide flocculant and inorganic coagulant in one product.
- Its a perfect match for a variety of water treatment equipment.
- It is highly charged with low viscosity, and can easily be dosed and mixed into a wastewater or sludge stream in a single dosing step.
- Read more about NORWAFLOC®, [here](#).

FILTRATION EQUIPMENT

- M Vest Water specializes in providing filtration solutions tailored to meet the specific needs of our clients.
- NORWAPOL® delivers a novel and environmentally friendly solution, without the use of synthetic polymers, achieving close to complete removal of harmful components to the environment.
- Read more about our polishing filtration process, NORWAPOL®, [here](#).

DAF DISSOLVED AIR FLOTATION UNIT

- M Vest Water provides Dissolved air flotation (DAF) units, a proven and effective physical/chemical technology for treating a variety of wastewater streams.
- These units are designed to enhance the separation process by removing suspended matter such as oil or solids.

CHEMICAL DOSING EQUIPMENT

- M Vest Water delivers high-quality chemical dosing equipment, including precision pumps, skids and valves.
- Our dosing systems are designed to ensure efficient and reliable fluid handling for a variety of industrial applications.

STATIC MIXERS

- M Vest Water offers static mixers, including innovative solutions like the Zeta potential mixers.
- These mixers are designed to improve water quality by enhancing coagulation and flocculation reactions, which are essential for removing dissolved components and colloids from water.

DEWATERING EQUIPMENT

- M Vest Water provides top-quality sludge dewatering equipment, designed to meet the specific needs of various industries.
- Our NORWAFLOC® products are not only efficient in enhancing dewatering properties but also contribute to environmental sustainability by reducing/removing synthetic chemicals. Our sludge experts in Germany are selecting both equipment and products to meet your need.

SYSTEMS AND SOLUTION PROVIDER

- M Vest Water is a systems and solution provider in the water treatment industry, offering innovative methods designed to address the specific requirements of each client.
- Our expertise spans a broad spectrum of services, including advanced filtration technologies and sophisticated chemical treatments, all aimed at delivering the highest standards of water purity and safety for diverse uses.
- Contact us [here](#), to learn more about our systems and solutions.
